

CAMFIL CITY L CONNECT

Connect to your Indoor air quality with the City L Connect. Monitor, control and improve the air you breathe

CITY L CONNECT KEY FEATURES

Certified HEPA filtration

All Camfil HEPA filters are individually tested and certified (H14) in accordance to the latest EN1822 test standard. This ensures that the HEPA filter will perform at its rated efficiency for the duration of its operational lifetime. Our HEPA filters are measured using pressure drop sensors to optimise the lifetime and performance of the unit.

Molecular filtration

Each unit is equipped with 2kg of Molecular filtration media to help remove VOCs, odours and gases from your indoor environment. This additional molecular filtration media ensures that the filter will not only perform better but also extend the operational lifetime of the filter.

Dual Air Intake

The City Connect range is designed utilising dual air intake to ensure optimal performance. Dual air intake ensures maximum room coverage, while enabling the use of double HEPA filtration to maximise the lifetime of the HEPA filter all while helping to reduce noise levels.

Sensor and Measurements

The City Connect range is equipped with specialised air quality sensors and monitors. These sensors allow for the real time measurement of Particulate Matter (PM) and VOCs while also giving in room readings for CO₂, temperature and humidity levels.

Interactive Display Screen

The City Connect range is equipped with an interactive display screen to enable easy use. The control panel allows the user to set operational parameters, monitor air quality and optimise the in room performance of the unit. The interactive display screen gives access to our measurements dashboard to display your air quality readings on any smart tv or device.

360 Degree Air Distribution

The City range has been designed with 360 degree airflow distribution to maximise the benefits of the clean air flow. The airflow distribution has been designed around the comfort and protection of the people within the operational area of the unit.

OTHER REASONS TO CHOOSE THE CITY CONNECT RANGE

Proof of Concept

The City Connect range allows the user to not only monitor and control the indoor air quality within their building but by using our unique display screen system, you can share the performance of the rooms air quality through any Smart TV, Screen or device in your building. With this clear focus on Indoor air quality you can put your employees mind at ease and show that you care about the air they breathe and are providing best in class solutions to your workforce.

Designed solution

At Camfil we understand that not every building faces the same indoor air quality challenges. Our teams of trained professionals can support you to ensure your system is designed to optimise the air quality in your building. To support your air quality requirements we take a three stage approach:

Assess: Check the buildings environmental and operational challenges.

Design: Design a solution to meet air quality requirements.

Report: Provide clear information on the performance of the solution.

A Global Brand that you can Trust

Clean air has been at the heart of Camfils business for 60 years. With dedicated teams of specialists in all regions we can ensure that your air quality needs are achieved throughout the globe.

Camfil – a global leader in air filters and clean air solutions

For more than half a century, Camfil has been helping people breathe cleaner air. As a leading manufacturer of premium clean air solutions, we provide commercial and industrial systems for air filtration and air pollution control that improve worker and equipment productivity, minimize energy use, and benefit human health and the environment.

We firmly believe that the best solutions for our customers are the best solutions for our planet, too. That's why every step of the way – from design to delivery and across the product life cycle – we consider the impact of what we do on people and on the world around us. Through a fresh approach to problem-solving, innovative design, precise process control and a strong customer focus we aim to conserve more, use less and find better ways – so we can all breathe easier.

The Camfil Group is headquartered in Stockholm, Sweden, and has 30 manufacturing sites, six R&D centres, local sales offices in 35 countries, and about 5,600 employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world. To discover how Camfil can help you to protect people, processes and the environment.
